

HESHAN MINOD

Full Stack Developer · IT Undergraduate (SLIIT)

+94 76 648 4473 | heshhmk@gmail.com | Malabe, Sri Lanka | GitHub: github.com/Hesh7050 | LinkedIn: linkedin.com/in/heshan-minod-01618a35a

PROFESSIONAL SUMMARY

Full Stack Developer and BSc (Hons) Information Technology undergraduate at SLIIT with hands-on experience building scalable, secure, and responsive web applications using the MERN stack and modern JavaScript frameworks. Proficient in React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, NestJS, Spring Boot, RESTful APIs, and JWT authentication. Experienced in designing role-based systems, dashboards, project management platforms, and data-driven applications following Agile methodologies and software engineering best practices. Passionate about solving real-world problems through clean, maintainable, and user-focused software solutions.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Java, Kotlin, Python, PHP, C, C#

Frontend Technologies: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend Technologies: Node.js, Express.js, NestJS, Spring Boot, RESTful APIs

Databases: MongoDB Atlas, MongoDB, MySQL, Mongoose

Authentication & Security: JWT Authentication, bcrypt, Role-Based Access Control

Tools & Platforms: Git, GitHub, Postman, VS Code, Figma, Android Studio, Eclipse

Development Practices: MVC Architecture, OOP, Agile/Scrum, REST API Design, Git Version Control

CORE COMPETENCIES

- Full Stack Development
- MERN Stack
- REST API Development
- Database Design
- Authentication & Authorization
- Responsive UI Development
- Software Testing
- Problem Solving
- Team Collaboration
- Agile Development

EDUCATION

BSc (Hons) — Information Technology | *Sri Lanka Institute of Information Technology (SLIIT)* 2023 – 2027 · Malabe, Sri Lanka

- Specialisation in Information Technology · Current undergraduate student
- Key modules: Software Engineering, Data Structures & Algorithms, Database Systems, Web Technologies, Mobile Development, OOP

G.C.E Advanced Level (A/L) | *Sri Naga National School* Completed · Commerce Stream

- Commerce stream — strong analytical and quantitative foundation

Diploma in English Language | *British Way English Academy* 2022 · Sri Lanka

- Professional English communication — reading, writing, and spoken proficiency

LANGUAGES

English (Professional proficiency) | Sinhala (Native)

PROJECTS

Student Marketplace Platform (UniTrade) | *Full Stack Web Application* 2026 · React · Node · MongoDB

- Built a full-stack marketplace platform enabling students to buy and sell products within a secure, validated campus environment using the MERN stack (React.js, Node.js, Express, MongoDB).

- Implemented JWT-based authentication with bcrypt password hashing, protecting all user routes and ensuring only verified users can list or purchase products.
- Engineered multi-image product upload functionality using Multer middleware, supporting concurrent image handling with server-side validation.
- Developed a dynamic product dashboard featuring real-time search, category-based filtering, and seller filtering — reducing product discovery time significantly.
- Built a complete product ordering flow including quantity selection, automated 7-day quality guarantee calculation, shipping cost computation, and detailed order summary.
- Designed fully responsive UI across all pages using CSS custom properties and a consistent purple/white design system — mobile-first approach.
- Structured backend using RESTful API conventions (GET, POST, PUT, DELETE) with Express.js and Mongoose ODM for clean data modelling.

Warehouse Management & Inventory System | *MERN Stack Web Application 2025 · MongoDB · Express · React · Node*

- Improved a web-based system to automate warehouse operations, reducing manual data entry errors by streamlining inventory tracking workflows.
- Applied real-time inventory tracking and decision-making dashboards using React.js, improving operational visibility across warehouse departments.
- Built RESTful API endpoints with Express.js and Node.js handling product stock management, order processing, and reporting features.
- Created MongoDB collections with Mongoose schemas for products, orders, and users — optimised for fast query performance.

Weekly Report Generator & Team Dashboard | *MERN Stack Web Application 2026 · MongoDB · Express · React · Node*

- Developed a full-stack MERN web application to streamline weekly report submission and team performance tracking.
- Implemented JWT-based authentication with secure role-based access control for Team Members and Managers.
- Built responsive dashboards with React.js, Tailwind CSS, and Recharts to visualize report statistics and team insights.
- Designed and developed RESTful APIs using Node.js, Express.js, and MongoDB (Mongoose) for report, project, and user management.
- Developed CRUD functionality for weekly reports, project management, team member management, and user profiles.
- Implemented advanced report filtering by team member, project, status, and date range for managers.
- Integrated MongoDB Atlas for cloud database management and optimized data relationships using Mongoose.
- Added modern UI features including Dark/Light Mode, responsive layouts, profile management, notification center, and project assignment functionality.

SHINIX — Electronics Shopping App | *UI/UX Prototype 2024 · Figma · UX/UI Design*

- Created a user-friendly mobile UI prototype for an online electronics shopping platform, covering product browsing, secure checkout, and real-time order tracking screens.
- Produced complete wireframes, user flow diagrams, and high-fidelity Figma mockups following Material Design principles and WCAG accessibility guidelines.

Wellness Tracker | *Android Application 2024 · Kotlin · SharedPreferences · Android Studio*

- Built a habit-tracking Android application using Kotlin with persistent local data storage (SharedPreferences) and smart push notifications to maintain daily routine consistency.
- Designed an intuitive dashboard with progress visualisation using Material Design components and Android Studio best practices.
